

**CITY OF COLUMBUS
DEPARTMENT OF PUBLIC SERVICE
DIVISION OF DESIGN AND CONSTRUCTION**

**SUPPLEMENTAL SPECIFICATION 1650
FIELD OFFICE PRINTER AND NETWORK INFRASTRUCTURE WIRING**

February 1, 2012

1650.01 Description

1650.02 Printer/Copier/Scanner/Facsimile

1650.03 Network Infrastructure Wiring

1650.01 Description. The Contractor shall provide a printer device and network infrastructure for the field office type as specified.

1650.02 Printer/Copier/Scanner/Facsimile. Field office printer device shall be, at a minimum, a monochrome 4-in-1 style device capable of sending/receiving facsimile transmissions, producing photocopies, generating scans of existing documents, and printing in sizes as large as 11x17 (ledger). Device must be network-ready, with a data port for RJ45 type network connectors. Paper, toner, and service for the device must be provided for the duration of the field office.

1650.03 Network Infrastructure Wiring. The field office shall be provided with network infrastructure wiring, including a minimum of five CAT 5 outlets for a Type B or a minimum of seven CAT 5 outlets for a Type C field office. The City will make all arrangements for internet connectivity with the internet provider, however the field office must be made ready to receive any necessary wiring hardware.
