PUBLIC UTILITIES	Sanitary Sewers	(P) 650872-153005	Blueprint Hilltop 1 Eureka / Fremont Lateral Lining Project 5	This project will line the sanitary lateral for homes in the Hilltop 1 Blueprint area.	11/6/2024(P)	12/4/2024(P)
PUBLIC UTILITIES	Sanitary Sewers	(P) 650352-100007	SWWTP Main Drain Alternative Pipe Route	Wastewater plants have a Main Drain that captures all residual wastewater and directs it back to the head of the plant for further processing. Internal building drains, the contents of tanks being emptied, and wastewater that is skimmed from various solids removal processes are examples of flows that are directed to the Main Drain. When large wet weather events occur, gates at the head of the plant must control flow into the plant. At Southerly Wastewater Treatment Plant, those gates (located at the Influent Junction Chamber (IJC)) also protect the Main Drain from inundation and protect the plant's buildings, structures, and processes from Main Drain backflows. Those gates have deteriorated and can no longer control flow into the plant or prevent Main Drain inundation. This project will construct a flow diversion structure within the plant's Main Drain and an alternative pipe so that Main Drain flows can be redirected to the Raw Sewage Pump Building during large wet weather high flow events to prevent inundation of the Main Drain system and back-ups into plant processes, structures, and buildings. This project will also investigate the bar rack gates as a means to control the plant's influent flows.	11/11/2024(P)	12/11/2024(P)

PUBLIC UTILITIES	Storm Sewer	(P) 611040-100000	Barnett Road Stormwater Improvements Project	This project will investigate existing stormwater drainage issues along Barnett Road between E. Main Street and E. Livingston Avenue. Existing storm sewers on Barnett Road, E. Main Street, E. Mound Street, S. Hampton Road, Astor Avenue, Bolton Avenue, Towers Court N., Towers Court S., Ruby Avenue, S. Waverly Street, Brownlee Avenue and E. Livingston Avenue will be investigated to determine their condition and capacity to serve as outlets. After the investigation is complete, engineering recommendations and detailed plans will be developed to construct a new storm sewer system to mitigate stormwater drainage issues.	12/30/2024(P)	1/29/2025(P)
PUBLIC UTILITIES	Water	(C) 690236-100139	Barnett Road Water Main Imp's	Barnett Road Water Main Imp's. is a child project to the DOSD project. The purpose of this project is to construct necessary improvements to the water distribution system along Barnett Road. The improvements identified in the scope of work will replace or rehabilitate mains that have high break histories and require frequent maintenance. This project includes replacing approximately 915 linear feet of 8-inch water mains within the project area. This water line work will be bid concurrently with the Division of Sewerage and Drainage Barnett Road project, CIP 611040-100000.	12/30/2024(P)	1/29/2025(P)

PUBLIC UTILITIES	Storm Sewer	(P) 611037-100000	Krieger Court Stormwater Improvements	The purpose of the Krieger Court Stormwater Improvements project is to provide design recommendations to alleviate known drainage issues upstream and downstream from the Krieger Court detention basin. Complaints of surface flooding and sewer system backups upstream of the basin have been reported. As part of this project, existing issues and previous studies will be analyzed. Following the investigation, this project will allow for an analysis and design of stormwater system improvements to alleviate standing water and stormwater drainage issues. This project is at the 30% design level.	1/8/2025(R)	
PUBLIC UTILITIES	Sanitary Sewers	(P) 650860-322190	Upsizing Sewer Pipes Project ID 3 Near South	This project upgrades the collection system in the Near South Blueprint area by upsizing an existing sewer pipe from 10 inches to 15 inches in diameter. PUBLIC UTILITIES	Sanitary Sewers	(P) 650902-100001	Clinton Sewer District Number 3 - OSU Carmenton District Sewer Extension	This project consists of constructing a new sanitary sewer extension along Woody Hayes Drive from the Clinton SD#3 trunk sewer west of Olentangy River Road to a point west of Kenny Road. This will be designed by OSU and constructed by City of Columbus under terms of a TIF agreement between OSU and Columbus. Extension of the sewer along Kenny Rd. to Lane Ave is also anticipated.	1/10/2025(P)	2/12/2025(P)
PUBLIC UTILITIES	Sanitary Sewers	(P) 650870-101202	Blueprint Miller Kelton - Kelton/Fairwood	The Kent/Fairwood area is generally bounded by Main Street to the north, Livingston Avenue to the south, Railroad tracks to the east, and Kelton Avenue to the west. This project will look at an integrated solution for Consent Order requirements of the City's Wet Weather Management Plan. Due to the sequencing of the projects, this project focuses on green infrastructure alternatives because the green infrastructure needs to be operational prior to roof drain redirection or sump pump installation. Mainline sewer lining and sump pump installation will be handled under a separate contract. This contract evaluates green infrastructure alternatives and evaluates private sanitary and storm laterals that drain sewage and stormwater from homes.	1/13/2025(R)	2/19/2025(R)
PUBLIC UTILITIES	Sanitary Sewers	(P) 650505-100001	SMOC Inventory Control Consolidations	The SMOC Inventory Control has around 16 separate store rooms located throughout the Fairwood Facility. PUBLIC UTILITIES	Sanitary Sewers	(P) 650870-101201	Blueprint Miller Kelton - Newton/Bedford	<p>Blueprint Miller-Kelton Newton-Bedford project area is part of the City of Columbus Integrated Solution, commonly referred as Blueprint Columbus. Blueprint Columbus is a program designed to achieve water quality and performance goals identified in the 2005 Wet Weather Management Plan (WWMP) through implementing the 4 pillars of Blueprint. The 4 pillars of Blueprint consist of the construction of green infrastructure, lateral lining, roof redirection, and sump pump installation. The Integrated Plan and 2015 WWMP Update Report proposing Blueprint Columbus was approved by Ohio EPA on December 1, 2015. This project will install permeable pavers on multiple streets within the Newton Bedford area in order to meet the Consent Order requirements of the City's 2015 Wet Weather Management Plan in order to relieve WIBs and DSRs 193 and 199 in the Miller Kelton Newton/Bedford area. In accordance with the approved WWMP, this project is designed to mitigate SSO activity and WIB to a 10-yr level of service (LOS) through source control. Newton-Bedford area has two active DSRs (#193 and #199) and several WIBs. This project will construct the green infrastructure (first pillar) and is part of multi-phased project to address SSOs and WIBs. During this phase of the project, green infrastructure will be constructed in the ROW and on public property to capture and treatment rain water. Once this phase is constructed, the City will address the private property work; including lateral lining, downspout redirection and sump pump installation.</p>	2/10/2025(R)	3/19/2025(R)

PUBLIC UTILITIES	Sanitary Sewers	(P) 650346-100002	SWWTP VFD and Harmonic Filter Upgrades	The Fine Screening Building has 4 obsolete Rockwell PowerFlex 700 Variable Frequency Drives (VFDs) controlled with an older communications bus (ControlNet). The pumps at the Return Activated Sludge (RAS) control buildings have 36 obsolete Rockwell PowerFlex 700VFDs that are controlled with an older communications bus (ControlNet) network. The two sludge thickening buildings (Thickening Facility East (TFE) and Thickening Facility West (TFW)) have 31 obsolete Rockwell PowerFlex 700 and model 70 VFDs controlled with an older communications bus (ControlNet). These VFDs are nearing the end of their useful service life and are becoming increasingly difficult to repair and maintain. This project will replace these VFDs and their associated Harmonic Filters to continue the City's effort to upgrade its treatment facilities, provide efficient, reliable, cost-effective operations, and enhance personnel safety.	9/8/2025(P)	10/8/2025(P)
PUBLIC UTILITIES	Sanitary Sewers	(P) 650870-110165	Blueprint Milford / Summit Area Integrated Solutions	This project will look at an integrated solution for Consent Order requirements of the City's Wet Weather. As an integral part of the City's updated plan, this project is included within the Blueprint Columbus Clintonville 3 area with a goal to reduce the amount of infiltration and inflow (I/I) into the sanitary sewer system and number of sanitary sewer overflows (SSOs) at designed sewer relief (DSR) points. The Milford-Summit project area is bound by Indianola Avenue (west), Glen Echo Creek (south), North Broadway Avenue (north), and RR tracks (east). Due to the sequencing of the projects, this project focuses on green infrastructure alternatives because the green infrastructure needs to be operational prior to roof drain redirection or sump pump installation. Mainline sewer lining and sump pump installation will be handled under a separate contract. This contract evaluates green infrastructure alternatives and evaluates private sanitary and storm laterals that drain sewage and stormwater from homes. This project is currently at the 30% design level.	9/9/2025(R)

PUBLIC UTILITIES	Sanitary Sewers	(P) 650240-100000	JPWWTP Digester Improvements	The Jackson Pike Wastewater Treatment Plant collects the sludge solids from the plant's primary and secondary clarifiers and pumps them to thickening processes, then the thickened sludge solids are pumped to storage tanks. From the storage tanks, the thickened sludge solids are pumped to covered digestion tanks. The solids are left in the digestion tanks for 15 days in anaerobic conditions. These conditions allows reactions that reduce the plant's solids volume by approximately 40% and produces methane. The end product of this process is sludge that can be further thickened and used as a fertilizer on area farm fields or dewatered and mixed with compost to produce a soil amendment. The methane from this process can be used as fuel for the plant's boilers and will be used as a fuel for electric generation in the near future.	10/20/2025(R)	11/17/2025(R)
